

## Scintica Welcomes New Preclinical Imaging Product Specialist, Dr. Jörg Hamm

---

Scintica is thrilled to announce the appointment of Dr. Jörg Hamm as a new Preclinical Imaging Product Specialist in our Netherlands office, fortifying our commitment to advancing scientific research and medicine.

Scintica specializes in providing high-value instrumentation to scientists and the preclinical research community, connecting researchers with the most suitable research solutions and tools, and empowering their contributions to research and medicine.

"Selecting the right technology for a research project can be overwhelming and our broad portfolio of products allows us to offer both impartial and in-depth advice," says Blair Poetschke, President of Scintica.

### **Introducing Dr. Jörg Hamm:**

Dr. Jörg Hamm has an extensive background in Biochemistry and Molecular Biology and has joined us to increase Scintica's commitment to delivering advanced preclinical solutions. Dr. Hamm's academic journey started at FU Berlin, followed by a PhD from EMBL Heidelberg, focusing on RNA-protein interaction and RNA transport between nucleus and cytoplasm. His contributions span across renowned institutions, with specializations in developing RNA libraries and creating tumor-specific PET-probes. With 11 years as a Field Application Specialist in Optical Imaging, Dr. Hamm has refined his skills in addressing customer needs, support, and user training.

"Joining Scintica is a thrilling new chapter for me. I am eager to leverage my experience to contribute to Scintica's vision of connecting scientists with revolutionary research solutions. My journey has been about pushing the boundaries of science, and I look forward to continuing this journey with Scintica, supporting researchers worldwide in achieving remarkable breakthroughs."

"We are extremely excited to welcome Dr. Jörg Hamm to our team. His extensive knowledge and experience will be instrumental in strengthening our commitment to advance science and medicine," says Blair Poetschke.

### **About Scintica**

Scintica is a value-added reseller of advanced preclinical research instrumentation with locations in Canada, the USA, and Europe. Scintica carries a diverse but synergistic portfolio of products, encouraging a holistic approach to science, ranging from imaging systems to laboratory tools and equipment for both *in vitro* and *in vivo* studies.
